INTRO

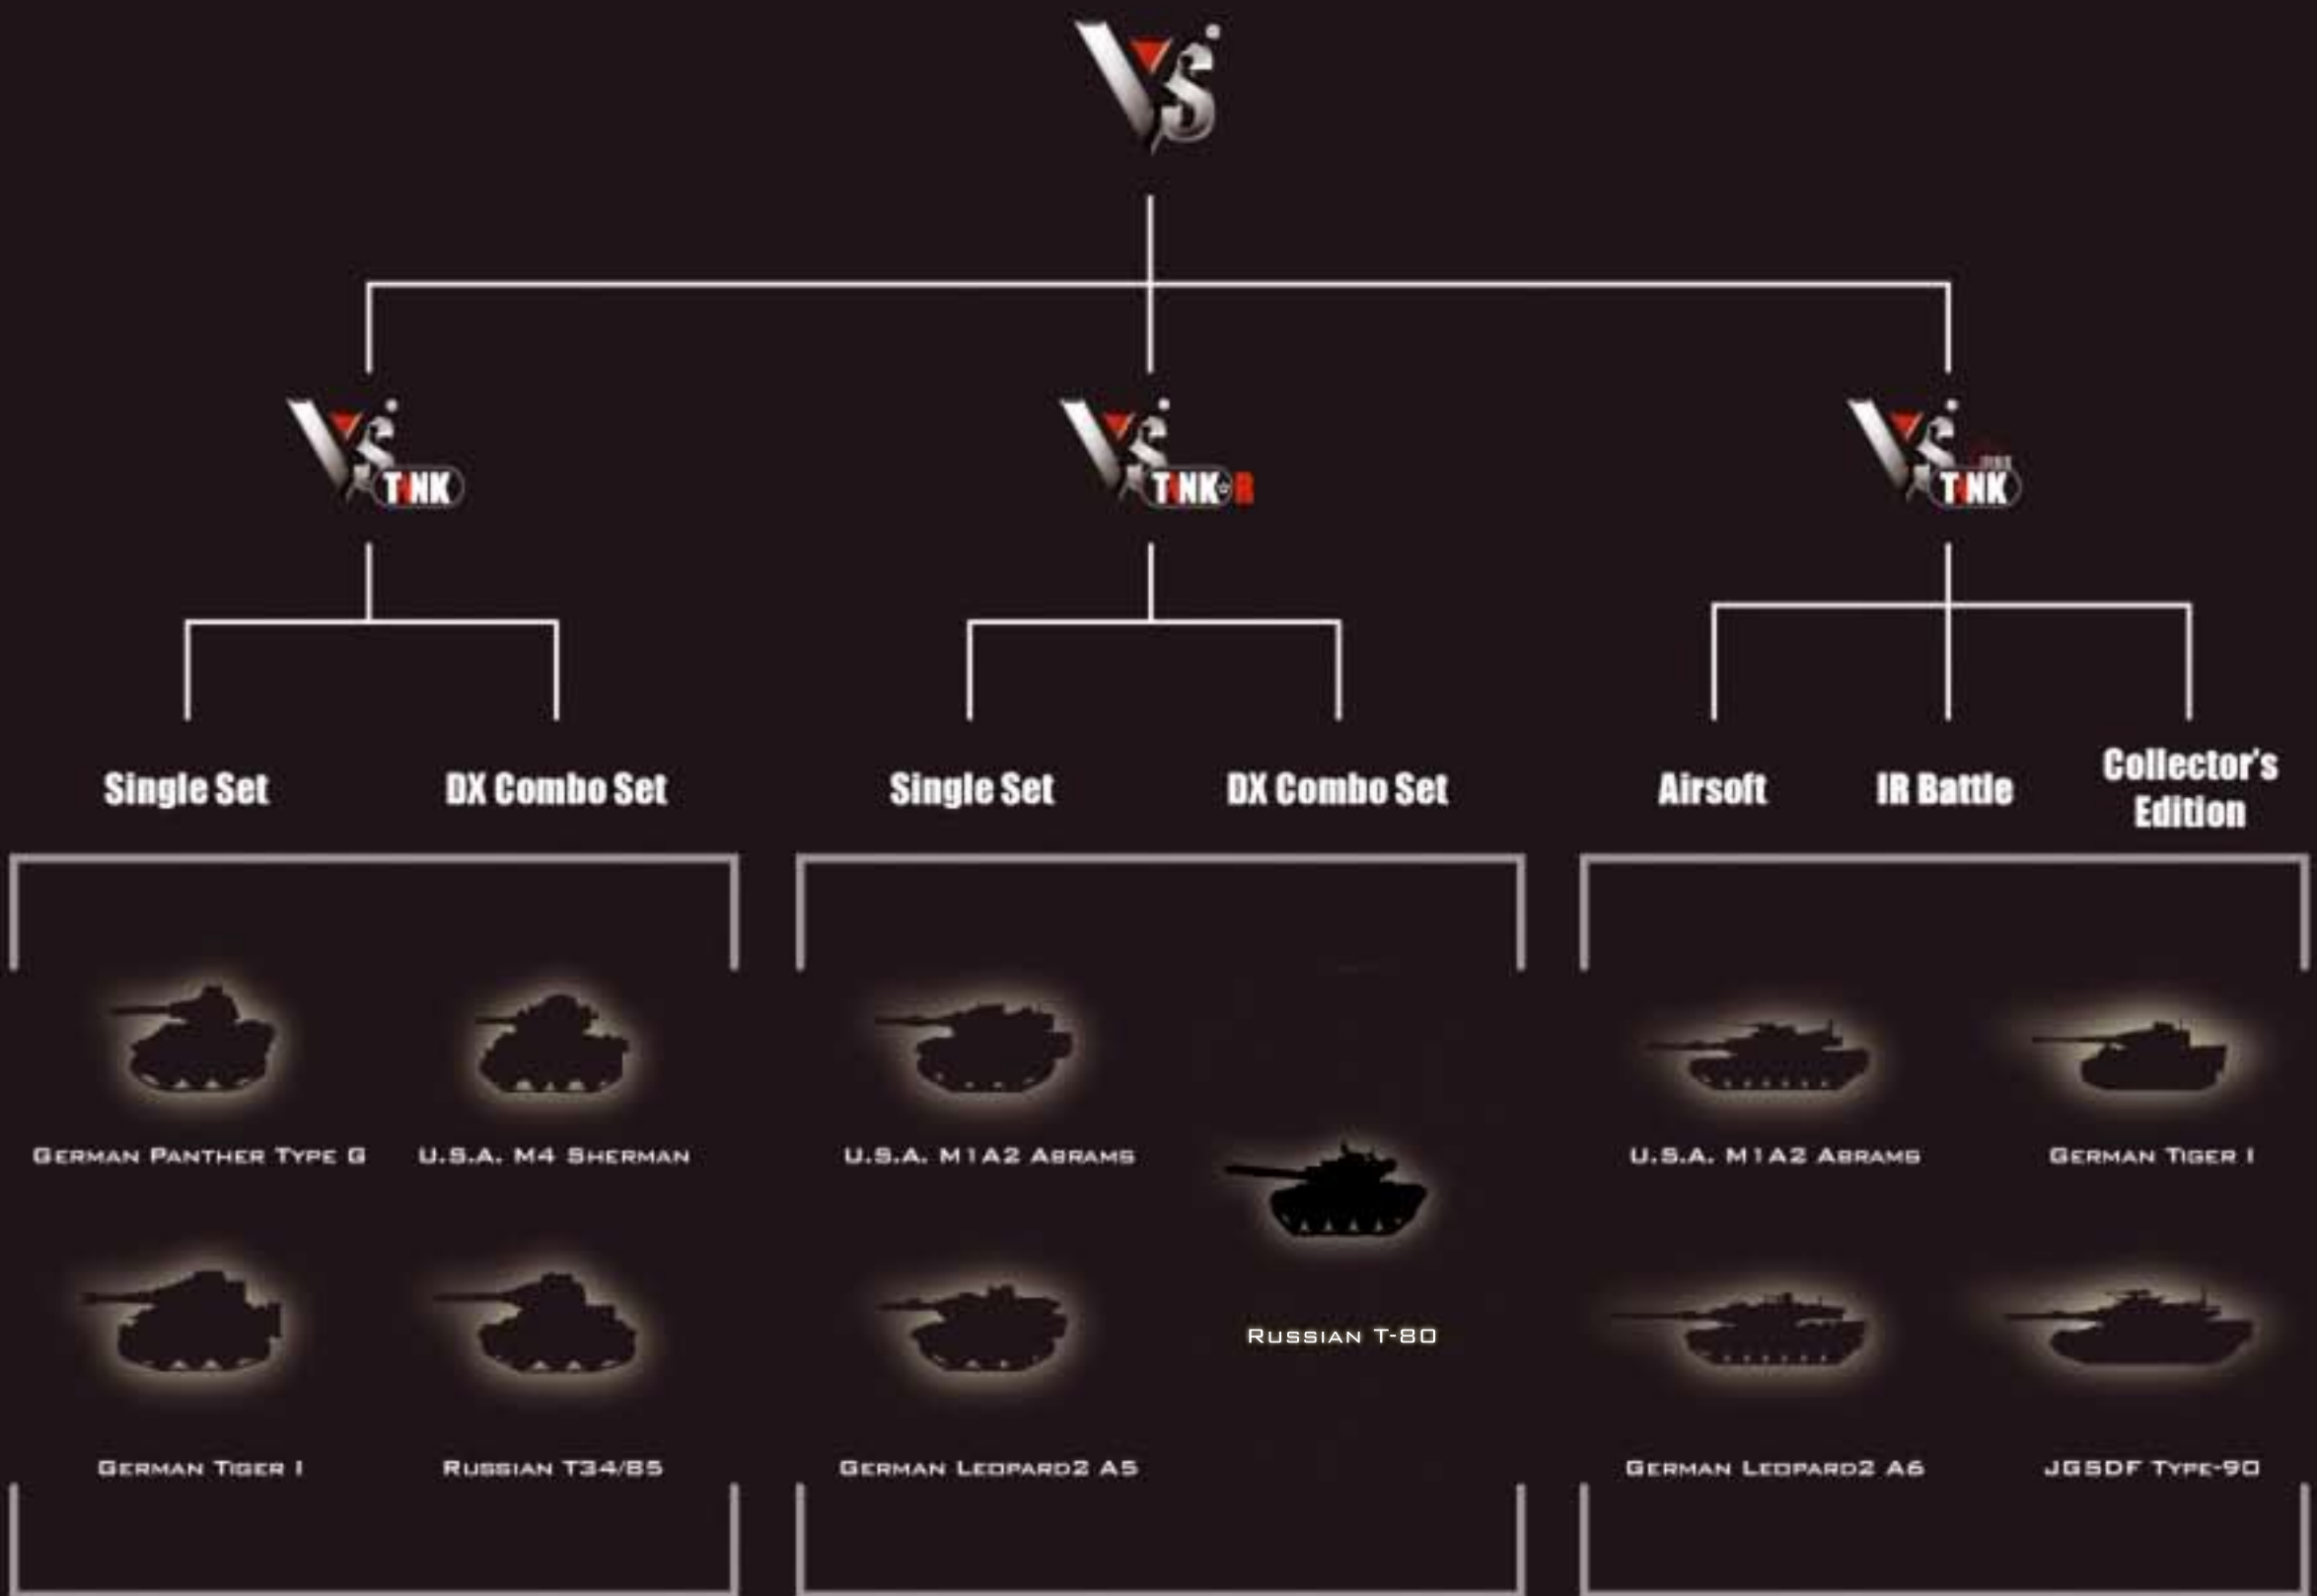

Thank you for taking your time to read this catalogue. The catalogue features a full listing of all VsTank products that are in the market this year.

VsTank is a brand of remote-controlled tank renown for its interactive versus functions, competitive prices, and always coming up with new ideas. The VsTank brand is divided into 3 different series, the VsTank, the VsTank★R, and the VsTank Pro. Each series has its own distinctive styles and differences, but all of them share the same point – the user enjoys playing with these tanks. No matter what age the user is, from a teenager to a 40 year old adult, they still had fun with VsTank. In this catalogue we hope that we are able to provide you with detailed information about our products.

However, when the catalogue is out, it might be outdated as we may have new products by then. Therefore we would like to invite you to visit our website, <http://www.vstank.com> for the most updated information about our products.

VsTANK PRODUCT LINEUP

VsTANK SERIES DESCRIPTION

The most fundamental series of VsTank, this revolutionary micro IR battle tank has 3 different volumes, featuring the legendary classic tanks reduced to a tabletop playable scale. The VsTank allows for 4 tanks to battle with each other simultaneously, and is easy to set up and start playing. The VsTank consists of the German Panther Type-G, The German Tiger I, the U.S. M4 Sherman, and the Russian T34/85. Each tank has its own ID and life counting system. The VsTank has two packages, one being the single set, and another the DX Combo set.

The VsTank☆R takes a large step upwards in micro IR battle tanks with more intense battles and excitement on your tabletop. Including a rotating turret, sound functions and a new machine gun function, the VsTank☆R is bound to create some new waves. The VsTank☆R has two packages, the single and the DX Combo set. There are 4 IDs, which means that 4 players can play at the same time. Currently the VsTank☆R has the U.S. M1A2 Abrams and the German Leopard2 A5 to choose from. There will be more tanks available in the future.

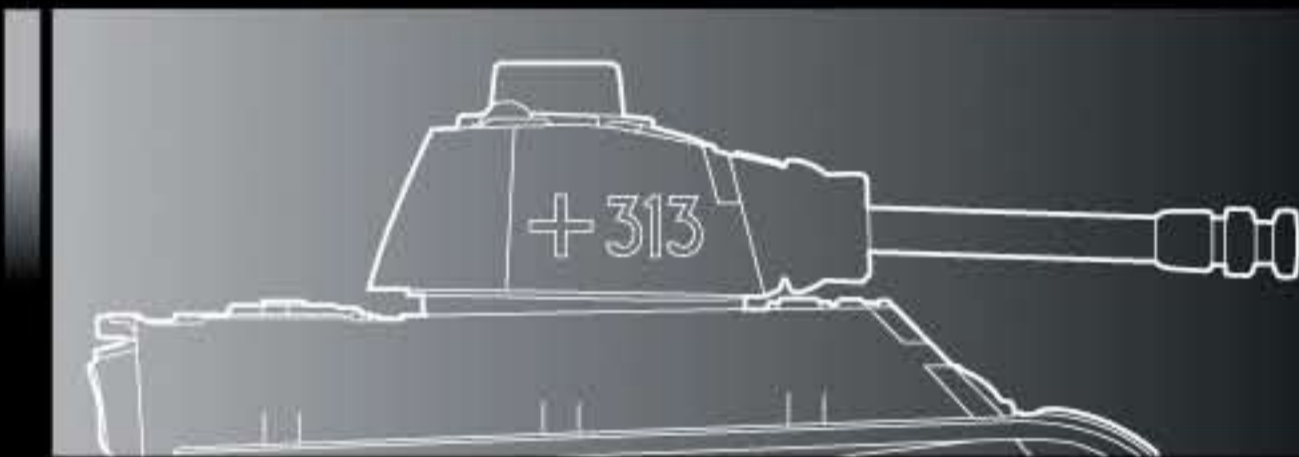

Taking a much more realistic feel and closer to a hobby toy than the regular VsTank, the VsTank Pro series (at accurate 1/24 scale) is divided into 3 different versions: The Airsoft version, the IR Battle version. All versions can support up to 6 different players. They are built with great detail and have extraordinary quality, and can be played indoors and outdoors. The IR battle version allows for the intense battles in the regular VsTank series with a more realistic feel. Aside from the above playable versions, there is also a Collector's Model as well! Currently the VsTank Pro has the M1A2 Abrams, the Leopard2 A6 and the Leopard2 A5 versions. In the future, look forward to the releases of the German Tiger I, and the Japanese Type 90.

LINE UP

The VsTank consists of the German Panther Type-G, the German Tiger I, the U.S. M4 Sherman, and the Russian T34/85. Each tank has its own ID and life counting system. The VsTank has two packages, one being the single set, and another the DX Combo set.

PANZERKAMPFWAGEN V PANTHER
**GERMAN PANTHER
TYPE-G**

The Panther first saw action on the Eastern Front in July 1943 during the Kursk battles, and from then on it was used on all fronts. Once the mechanical problems had been overcome confidence in the tank soon built up again, and many consider the Panther to be the best all-round German tank of World War II.

PANZERKAMPFWAGEN VI TIGER
**GERMAN TIGER I
EARLY PRODUCTION**

When it first appeared in combat at the end of 1942, the massive Tiger was the most powerful tank in the world. Slow, ponderous and none too reliable, it nevertheless dominated the battlefield. Allied tanks could not match its thick armour and powerful 88-mm gun, and no rivals would appear until the very end of the war.

MEDIUM TANK
U.S. M4 SHERMAN

The Medium Tank M4 with a turret-mounted 75-mm main gun is the baseline model and had minimum and maximum armour thickness of 15mm and 76mm, respectively. It proved to be an excellent fighting platform and went on to be one of the war-winning weapons of the Allies, being constructed in thousands.

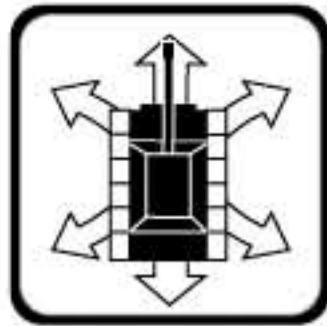

MEDIUM TANK
RUSSIAN T34/85

The T34 tank was a very advanced design for its time. The tank was produced in thousands and proved durable, mobile and highly effective in service. This forced the Germans on to the defensive and also took from them both the tactical and the strategic initiative, thus helping win the Great Patriotic War for the Soviet Union.

Supports up to 4 players

Full function controls

Climbs up to 30 degrees

Recoiling action

Infrared cannon

Hitting reaction

Life counting system

FUNCTIONS

After the VsTank got hit, its life indication LED will start flashing. After each successive hit, the LED flashes faster.

Each VsTank has a recoiling action when it shoots, and there is a 3 second delay afterwards.

When the VsTank is hit, it will spin on the spot and the tank will lose a life count.

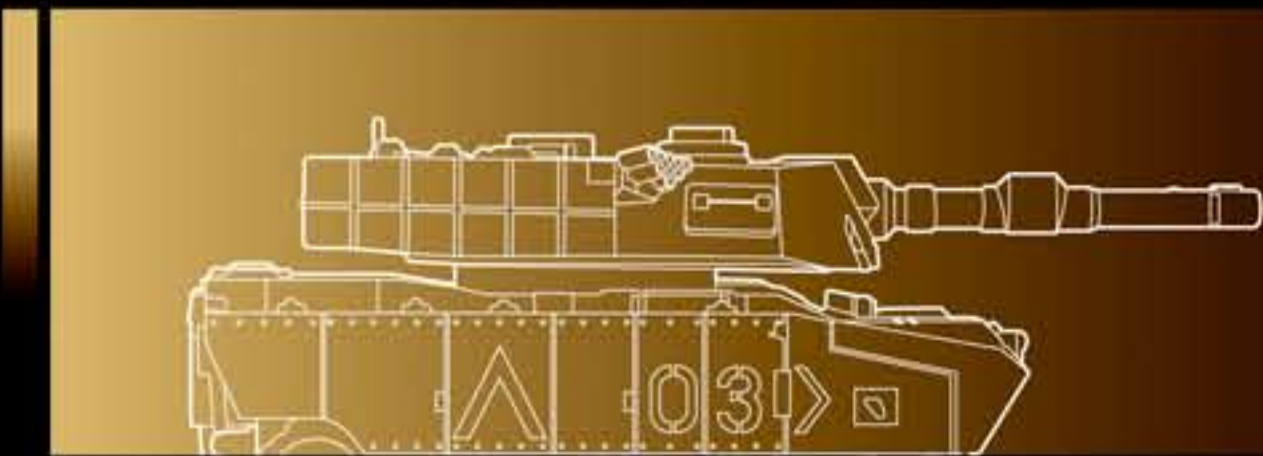

The VsTank has been the most fundamental series in the VsTank family, and now has 3 different volumes, each with a different color. Originating from the world-famous legendary tanks, the VsTank is one of the first RC tanks to feature an infrared battling system with life count, shooting action and all-direction controls. VsTanks are also easy to set up as well, allowing people of all ages to enjoy the fun of battling.

RC Battle Game

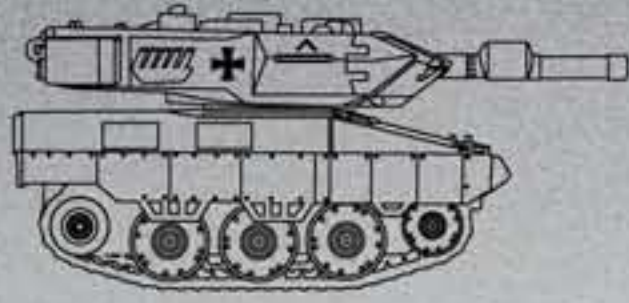

VsTank☆R is a market-defining product which brings a huge shock to the micro RC community. Its biggest breakthrough is the RC turret rotation ability, which not only adds another dimension to the battles, it also allows players to devise more strategies for winning their battles.

Also new to the game is a totally new machine gun function, where the tank can shoot continuously without any after-shot lag.

It also comes with new sound functions when it fires from a cannon or machine gun. All in all, the VsTank☆R offers much more than the current crop of micro RC tanks in the market.

Airsoft [Shoots BB Bullet]

The Airsoft version can shoot 6mm airsoft BB bullets up to 25 meters, and has a realistic shooting and tread moving sound, and a recoiling action when the tank shoots. The tank has full function controls, a wide-angle rotational turret, and individual wheel suspension. The tank can climb up to 45 degrees, and can support up to 6 bands.

Features:

- Airsoft gun • Rubber treads • 3 forward speeds • Full function controls • Tread movement sounds • Shooting distance of 25m • 1/24 scale with high details • Adjustable angle of cannon • Wide-angle rotational turret
- Individual wheel suspension system • Can climb at most 45 degrees • Recoiling action and firing sound when shooting • Exchangeable bands, allows for 6 different players at the same time

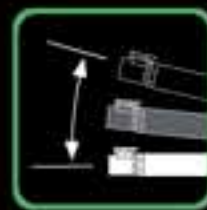

Supports up to 6 players

Infrared [Interactive Battle]

While the Infrared Battle version is from the same family as its airsoft counterpart, they are a totally different beast. While it has some of the function in the Airsoft version, such as the tread movement sound, recoiling action, and shooting sound, it has something that the airsoft versions do not. As you can see in the name, this is a battling version akin to the original VsTanks, which means that you can actually battle with each other using VsTank Pro IR Battle tanks. The tanks feature a life count system, along with new features such as lights and sound simulating an explosion effect, and invincibility after being shot by your opponent. This version supports up to 6 different players, allowing for more intense battles.

Features:

- Rubber treads • 3 forward speeds • Life counting system • Full function controls • Tread movement sounds • 1/24 scale with high details • Invincibility after being shot • Adjustable angle of cannon
- Infrared beam (no airsoft gun) • Real life reloading time after a shot • Wide-angle rotational turret • Individual wheel suspension system
- Can climb at most 45 degrees • Recoiling action and firing sound when shooting • The tank flashes lights, explosion sound and shakes when hit • Exchangeable bands, allows for 6 different players at the same time

Supports up to 6 players

Display [Collector's Series]

Featuring a totally new product line from the VsTank series – the VsTank Pro Collector's Series! We take the detailed and high quality models from the VsTank Pro line and turned them into display models for your home. The tank comes preassembled with a display stand. It features a weathering effect which comes pre-painted with the tank, and a display stand that comes with a plate signifying the tank's model name. The tank can rotate its turret, and can move forward and backward by hand. It also includes working front and back lights which can be turned on and off as well!

Features:

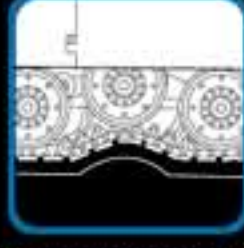

- Movable rubber treads
- Individual wheel suspension
- Rotational turret
- Openable hatch
- Light up lamps
- Detailed factory paint
- Wooden display case
- 1/24 accurate scale
